**Subject:** FW: Dec 12 am meeting with Brian Johnson

Amy et al-

Sorry for the short notice. Brian had planned to come by the office for some time as he was

going to be in town and they have a big meeting coming up next week on the permits program. The focus we had discussed was the permits workgroup and the 2025 waste reduction goal. He just sent the attached Friday afternoon expanding the number of topics substantially - many of which are now enforcement lead. If you all are available, I suspect you would also be interested in meeting with him.

My schedule is tight that day, so I'd like to propose we start with the waste division only stuff above and then move into the enforcement lead stuff at 9:30 or 10. Some of my folks can stay throughout depending on how fast things go.

Kelly Weddell our California project officer will help us coordinate if the need arises.

Let us know what you'd like to do.

Thanks!

Brian-

Sorry I didn't have e-mail access for a few days. We are definitely looking forward to seeing you on Thursday! Unfortunately, my Thursday is jam packed, so I was looking at 8:30 to 10 for me, but we could have you potentially continue with others beyond that. If it's ok, I was hoping to invite a number of my key folks associated with your program. Also, a number of the items you hope to cover I am no longer the lead on (enforcement division has the lead for Exide, CUPAs, etc now). I'll reach out to them on their availability and perhaps try to cover the enforcement related topics later in the meeting.

Let me know what you think.

Thanks!

Jeff

Jeff,

Are we still on for our meeting next Thur at your office? Hope so. If so, I'd like to address several issues, including our permitting program and the CPS report, CUPA's, Carlton Forge and Exide and state framework review. Please let me know if it still works, what time (I'm open pretty much the whole day) and if you will have other EPA folks participating. From my side, I expect it to be only me. Thanks much.

Brian
